PROFESSIONAL SUMMARY

AI/ML-focused Computer Science student at Rutgers University with hands-on experience building and deploying computer vision pipelines, LLM-integrated applications, and multi-source AI agents. Proficient in PyTorch, Hugging Face Transformers, and Python, with practical exposure to model inference, prompt engineering, and end-to-end AI application development.

EDUCATION

Rutgers University
Bachelor of Science in Computer Science. Honors College. GPA: 3.83.
Relevant Coursework: Data Structures, Introduction to Computer Science, Data 101

New Brunswick, NJ
Expected May 2029

EXPERIENCE

- AI Intern** September 2025 – November 2025

Elevate Health

 - Architected a hybrid AI web application that analyzes dermatoscopic images and delivers empathetic, safety-bound medical context to users.
 - Integrated a Vision Transformer (ViT) via Hugging Face, trained on the HAM10000 dataset, to perform multi-class skin lesion classification (carcinoma, melanoma) using PyTorch, achieving 100% correct diagnoses across all employer-provided sample images.
 - Engineered a secure prompt pipeline connecting computer vision model output to Google's Gemini 2.5 Flash LLM, translating raw diagnostic probabilities into patient-friendly language while enforcing medical disclaimers.
 - Developed a responsive UI using Streamlit, implementing model caching to optimize inference load times and surfacing data transparency through confidence score bars.
- AI Intern** July 2025 – August 2025

ideaHelix

 - Built a proof-of-concept AI knowledge agent in Python using the ChatGPT API to improve sales team effectiveness by surfacing information from multiple internal and external data sources.
 - Designed the agent to process diverse datasets including slide decks and spreadsheets, enabling structured information retrieval across document types.
 - Implemented web scraping to extract and index content from the ideaHelix website and LinkedIn page, expanding the agent's live knowledge base.

SKILLS

AI/ML Frameworks: PyTorch, Hugging Face Transformers, Vision Transformers (ViT)
APIs and Models: OpenAI ChatGPT API, Google Gemini 2.5 Flash
Languages: Python, Java
Tools and Libraries: Streamlit, Prompt Engineering
Other: Web Scraping
